Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to method for affecting cancer morbidity and mortality, classified in class 424, subclass 620, among others.
- II. Claim 20, drawn to a method for affecting heart disease mortality using an inhibitor of a protein kinase, classified in class 424, subclass 620, among others.

The inventions are distinct, each from the other because: Group I is directed to cancer and Group II is directed to heart disease. Each disease has a different etiology; and different compounds are used to treat each disease.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

An attempt to reach the Applicant was made on December 7, 2005 to request an oral election to the above election requirement, but was unsuccessful.
